## Remote Management

### Digital Signage

## Moki Device Management for digital signage brings extensive remote management capabilities to digital signage players and devices

Moki is proud to offer robust, yet simple to use, remote device/player management software for digital signage. With Moki, it's easy to keep a finger on the pulse on your digital signage network with our cloud-native remote management solution. Moki gives you granular control and visibility into your network so you can have peace of mind. Whether your deployment is 10 or 10,000, Moki makes it easy to scale, keeping deployment & maintenance costs down.
