

- Enterprise Mobility Management (EMM), also referred to as Mobile Device Management (MDM) for Dedicated Devices

## Your Device Management Provider

**Focused on addressing the increasingly complex needs of integrating digital into the physical world, Moki provides remote device management for company owned, dedicated devices.**

Moki gives you granular control and visibility into your network so you can have peace of mind. Whether your deployment is 10 or 10,000, Moki makes it easy to scale, keeping deployment & maintenance costs down.

### What is a dedicated mobile device?

Dedicated devices are mobile devices that are intended for one or only a few purposes, business-critical, and just need to work. These are devices like endless aisle tablets, mobile computers, kiosks, mPOS, and digital signage.
